FELDER

G 330

Professional solution for small workshops

Panel material

G 330

» Installation length: 2,444 mm
» Edge thickness 0.4–5 mm
» Workpiece thickness 10–45 mm
» + Automatic Quick-Set system
» Teflon-coated changeable gluepot

Increasing quality requirements in the compact edgebanding machine range, demands a complete solution in the smallest possible of spaces. Felder offers a professional machine at a competitive price: the G 330 is the smallest edgebander with a chain feeder and, with a total length of 2444 mm, it fits into every workshop. The perfect coordination of the individual components eliminates the need for manual postprocessing. Optimised workflow and increased productivity – a worthwhile investment for small workshops with high demands.

The advantages at a glance
» State-of-the-art technology with smallest set-up dimensions
» Central control unit for maximum operator comfort
» Constant contact pressure by means of two pressure rollers
» "Quick-Set-System" for quick adjustment to different edge material
» Pneumatically controlled scissor guillotine for precision trimming
» Teflon coated gluepot with 1.2kg capacity
» Quick changeover between flush, bevel and radius trimming

… Your decision for Felder, a risk-free decision

» The right machine for every budget
» Complete reliability in professional use
» Tailor made machine solutions
» High quality cast iron machine table and aggregates
» Innovative detail solutions derived from 70 years of experience – already included in the standard configuration
» First class manufacturing and finishing standards
» Intuitive application concepts
» Modern, distinct design
» Quality and precision from AUSTRIA
» Powerful and efficient
» Complete package: Comprehensive service support

The most important highlights at a glance

Upper spring-loaded pressure bar
The patented height adjustment of the upper pressure bar is carried out using a handle. On the large scale, you can easily read off the set measurement. The feed height can be adjusted from 10-45 mm by means of a newly developed quick change adjustment.

Teflon-coated changeable gluepot
The Teflon-coated changeable gluepot can be quickly and easily replaced and holds 1.2 kg of adhesive granulate. After a heating time of approx. 12 minutes, the machine is ready for use. The micro adjustable glue roller ensures the correct dosage of the hot-melt adhesive and allows perfect matching to different edge materials.

The quick and easy change to other adhesive colours and the use of PUR glue guarantee productive procedures and excellent edges for all areas of application.

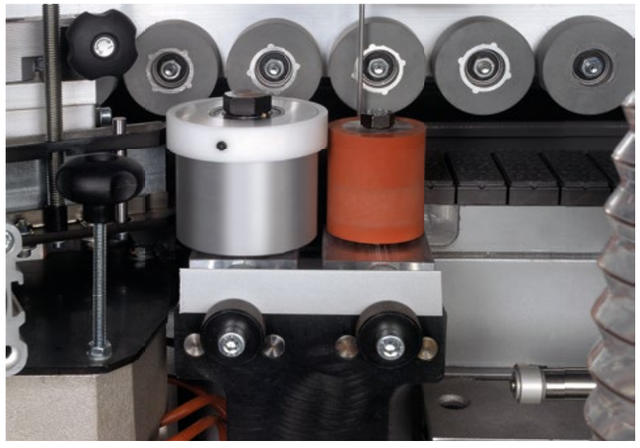

Operating panel with LCD display and keypad
The individual machine aggregates can be switched on and off easily from the clearly laid out control panel.
» Glue temperature settings
» Automatic glue temperature reduction
» Individual stations can be selected and disengaged
» Odometer for amount of material used
» Display of the maintenance intervals
» Plain text error messages

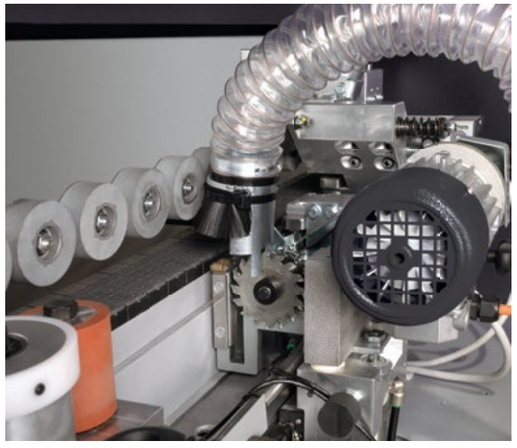

Details

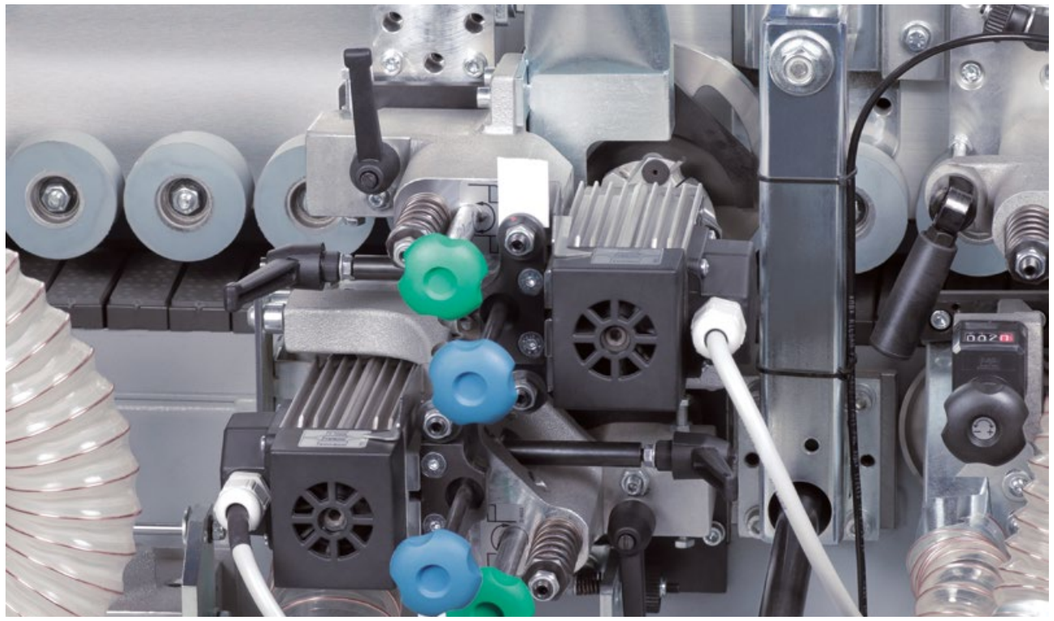

Space saver
The Felder G 330 is a real space-saver that offers professional edgebanding on the smallest of footprints.

Pressure unit
The pressure unit consists of a large roller with a second post pressure roller. These 2 pressure rollers provide a better pressing of the edging material against the workpiece. The whole unit is mechanically spring loaded and can be adjusted quickly and easily using the Felder "Quick-Set" System. This ensures a perfect join between the edge material and the workpiece.

End trimming unit
High precision linear guides ensure the perfect cut. The saw blades rotate at 9000 rpm, guaranteeing perfect cutting results regardless of the type and thickness of the wood.

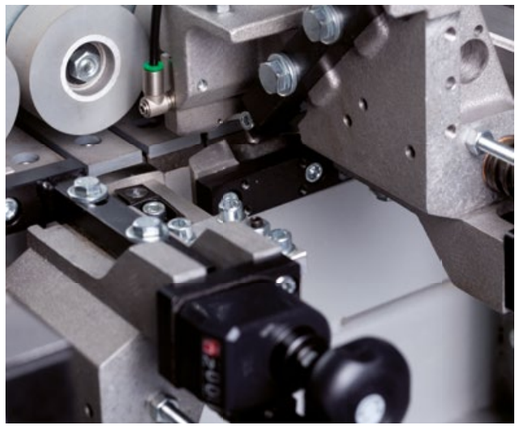

Multifunctional trimming unit
The biggest advantage of the combination unit is the considerably short machine length. Adjustment of the settings from flush to bevelled finish for thin edges and also radius trimming is quick and easy. 2 mm radius tooling is included as standard.

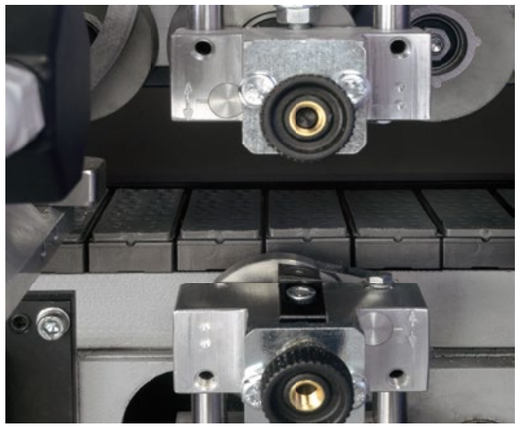

Buffing unit
Super finish for ABS and PVC edging material. The machine can optionally be equipped with spraying equipment to apply polish onto the buffers.

2 FREE SPACES FOR A PERFECT FINISH

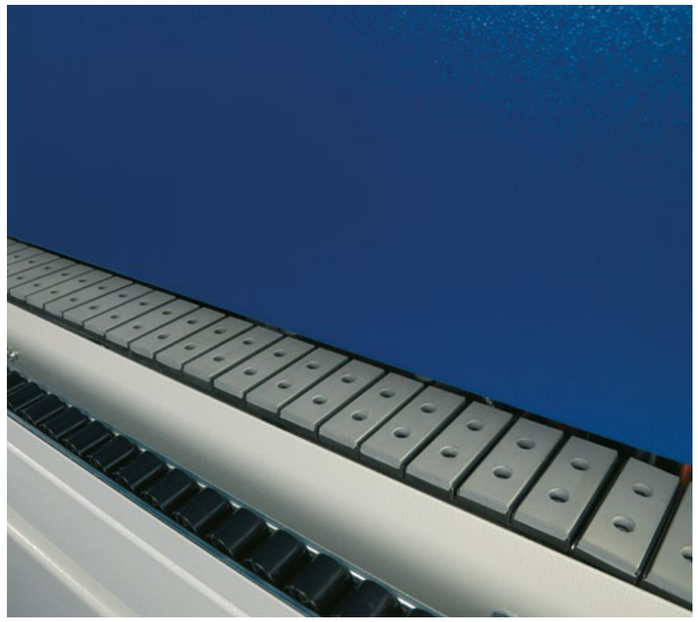

Radius glue scraper
Improves the edge finish by lightly culling the radius, removing any glue residue and chatter marks.

Glue scraper
Removes any remaining glue residue from the workpiece for a perfect finish without the need for reworking.

Workpiece – chain feeder
Constant workpiece feed with a chain unit and spiral shape feed rollers, leave no marks on the workpiece surface of high quality laminated materials. The click system guarantees quick and easy replacement any worn plastic pads. The round and flat shaft guides ensure that the workpieces are guided straight through the machine without tilting.
